Radeon™ E8860 (Adelaar) Video & Graphics XMC

Embedded Computing
without Compromise

- Single Width XMC
- PCIe x8 Gen 2.0 Host Interface
- AMD Radeon E8860 (Adelaar) GPU
 - ▶ 6 Independent Graphics Heads
 - ▶ 2GB GDDR5
- Analog and Digital Video Inputs
- Analog and Digital Video Outputs
- Full Video Switching Capabilities
- Video Capture and Overlay
- Video Resize and Customized Formats
- Full 2D/3D Processing Capabilities
- Universal VPWR 5V/12V
- Enhanced Graphics & Video Support
 - ▶ DirectX® 11.1
 - ▶ Shader 5.0
 - ▶ OpenGL 4.2
 - ▶ OpenCL 1.2
- Operating System Support
 - ▶ Windows™
 - ▶ Linux®
 - ▶ VxWorks®
 - ▶ INTEGRITY®

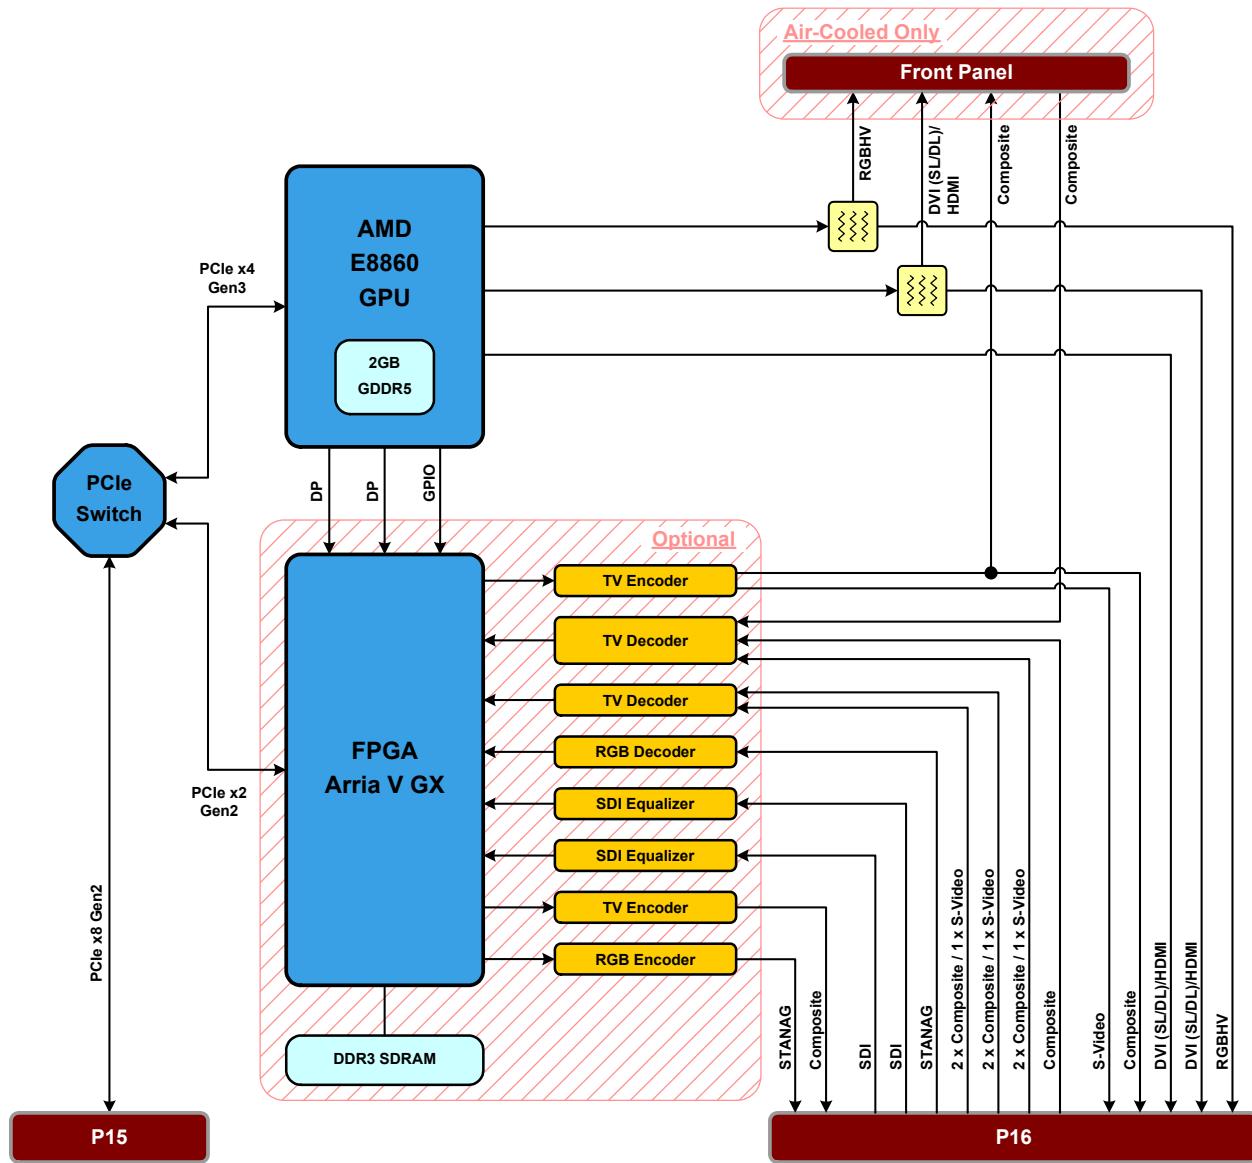

Aitech's M596 6-Head Multiple Output Graphics XMC provides a high-performance, highly versatile embedded video and graphics solution for harsh environment applications. Designed around the AMD E8860 Six Head Graphics Processing Unit with its 2 GB of GDDR5, the M596 can simultaneously drive several independent video streams in a wide variety of output formats.

The M596 supports the most advanced graphics and video standards including DirectX, OpenGL, and H.264, as well as multiple and versatile graphics and video input/output protocols. A number of the standard M596 output video channels are provided through E8860 native integrated video ports. Additional video protocols/formats and signal conditioning are provided by an optional sophisticated FPGA residing alongside the E8860 GPU, to complement the GPU's capabilities.

In addition, the M596 provides advanced video overlay functionality. The E8860 processor generates the graphics images, superimposes an input from one of the various video formats, and drives the result to a monitor. Additional overlay processes can be implemented simultaneously via additional independent video streams, using a different video input. This process can be routed to the FPGA for output on an interface not supported natively by the GPU.

To ensure high-speed transfer of graphics and video, the M596 interconnects with the host system via an 8-lane PCIe link.

Software

The M596 is available with several GPU versions for use with different operating systems (see *Ordering Information*). Two versions support VxWorks and INTEGRITY, and the other supports Windows and various distributions of Linux.

The general Windows/Linux version of the M596 is supported by AMD's freely available standard driver package.

The standard VxWorks/INTEGRITY version of the M596 includes the CoreAVI driver, which supports x86 and PowerPC architectures. A second VxWorks/INTEGRITY version is available without the CoreAVI driver. This version is only for customers who have a licensing agreement with CoreAVI as it cannot be used without the CoreAVI driver.

For systems requiring DO-178B certification, the CoreAVI Software DO-178B OpenGL package is also available.

Power

M596 Power Consumption

	Supply ^{(2) (3)}			Total Power	
	+3.3V	VPWR (Universal +5V/+12V)			
Typ ⁽⁴⁾	0.9 A	+5V @ 6.5 A	or	+12V @ 2.7 A	35.4 W
Max ⁽⁵⁾	1.4 A	+5V @ 9.1 A ⁽¹⁾	or	+12V @ 3.8 A	50.3 W

Notes: (1) Full performance not assured under these conditions; +12V VPWR is recommended.

(2) +12V, +3.3V_AUX of the XMC standard not required

(3) -12V (with consumption of ~20 mA) is required only if the STANAG output is used

(4) GPU clock @ 400 MHz, GPU memory clock @ 550 MHz, running 3DMark 11 Benchmark @ 1280 x 720

(5) GPU clock @ 625 MHz, GPU memory clock @ 1125 MHz, running 3DMark 11 Benchmark @ 1280 x 720

GPU Performance vs. Power Consumption

Clocks [MHz]		Power [W]		Performance
GPU	Memory	Idle ⁽¹⁾	Max ⁽²⁾	Score
300	150	7.2	14.4	969
400	550	12.6	24.2	1925
500	950	14.9	29.6	2471
625	1125	15.7	33.8	3023
Power Play Configuration ⁽³⁾		7.2	33.5	2968

Notes: (1) Idle Power measured in Windows 7 idle mode

(2) Max Power measured during 3DMark11 Benchmark tests

(3) Power Play can be used with AMD driver only

(4) 3DMark11 Benchmark @ 1280 x 720

Test Platform: Gigabyte Technology Co. Ltd. H77-DS3H

Motherboard with Intel Core i7 3770K Quad Core @ 3.9GHz and 8 GB DDR3 @ 667 MHz, Windows 7 32-bit OS with AMD VENUS PRO MCM(6822) Ver. 13.251.0.0 Driver

(2) Operating ambient air temperature (with sufficient airflow)

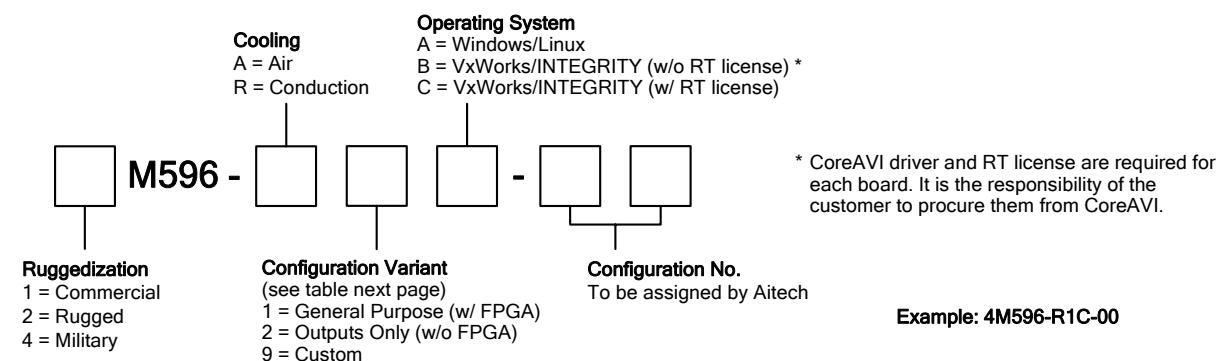

(3) Operating card edge temperature

(4) Non-condensing

Accessories

TM596	6U Transition Module providing convenient access to M596 I/O interfaces via standard connectors. The TM596 is a plug-in extension to Rear Transition Modules (RTM) for Aitech 6U SBCs and is used to access M596 I/O when the M596 is mounted on an Aitech SBC. Supports both air and conduction-cooled M596 mounted in commercial air-cooled chassis. Refer to the TM596 datasheet for further information.
TM530	Rear Transition Module (RTM) providing convenient access to M596 I/O interfaces via standard connectors when the M596 is mounted on a CM870 XMC Carrier. Supports both air and conduction-cooled M596 mounted in commercial air-cooled chassis. Refer to the TM530 datasheet for further information.

Ordering Information

M596

Radeon™ E8860 (Adelaar) Video & Graphics XMC

Embedded Computing

Configuration Variants⁽⁸⁾

This table lists the number of I/O channels for each of the standard M596 variants.

Interface		Variant 1	Variant 2
Video Outputs	HDMI/DVI ⁽¹⁾	2 ⁽²⁾	2 ⁽²⁾
	RGBHV	1 ⁽³⁾	1 ⁽³⁾
	S-Video	1 ⁽⁴⁾	0
	Composite	2 ⁽⁴⁾⁽⁵⁾	0
	STANAG 3350	1	0
Video Inputs	SDI	2	0
	Composite	7 ⁽⁶⁾⁽⁷⁾	0
	S-Video	3 ⁽⁷⁾	0
	STANAG 3350	1	0

Notes: (1) Software selectable as 2x DVI or 1x DVI + 1x HDMI. DVI auto configures as single or dual-link depending on the monitor (or other device) connected.

(2) In air-cooled boards one of these channels is available only at the front panel (not at P16)

(3) In air-cooled boards the RGBHV output is available only at the front panel (not at P16)

(4) Composite Output 0 and S-Video Output 0 are clones that are generated by the same video encoder

(5) A clone of P16 Composite Output 0 is routed to the front panel of air-cooled boards, the channel cannot be used simultaneously at both locations

(6) One additional composite input is available at the front panel of air-cooled boards

(7) Because ports are routed to shared pins, each S-Video input is available at the expense of two Composite inputs. Due to shared decoders, a maximum of two Composite/S-Video inputs can be used simultaneously.

(8) Pinout compatibility with Aitech M595 XMC configuration 3 is available by special order.
